## Successful completion of pilot phase: Clinic Lengg and QUMEA extend cooperation

*Solothurn, March 3, 2025 – The Clinic Lengg in Zurich, a leading competence center for epileptology and neurological rehabilitation, is continuing its collaboration with QUMEA following a successful pilot phase.*

Clinic Lengg specifically uses QUMEA to provide even more comprehensive care for patients at high risk of falling. Using radar technology, QUMEA detects potential fall risks in the room at an early stage and alerts staff via an app. This allows nursing professionals to provide assistance as quickly as possible.

Carina Kouraichi, Head of Nursing Epileptology, adds: "The use of QUMEA has significantly improved our workflows. The nursing staff can trust that vulnerable patients receive the best possible protection against falls. This system provides a kind of mental relief in everyday clinical practice."

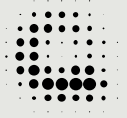

Data protection is a top priority at Clinic Lengg. QUMEA fully meets the high standards of data protection and discretion. The technology is designed from the ground up to operate anonymously – no personal data is collected, processed, or stored.

Both Clinic Lengg and QUMEA are satisfied with the progress of their cooperation. The successful pilot phase lays the foundation for a long-term partnership aimed at further optimizing fall prevention. Clinic Lengg and QUMEA look forward to continuing their collaboration.

### ABOUT QUMEA

QUMEA is the market leader in digital mobility monitoring in patient rooms. The system anonymously captures motion data using radar technology, analyzes it, visualizes it, and automatically informs staff about dangerous situations. Patient privacy is maintained as no cameras or microphones are used. In acute care settings, a 74% reduction in falls has been achieved on average, setting a new standard in proactive and preventive patient care.

More than 120 leading institutions, including the Hirslanden Group, Universitäre Altersmedizin Felix Platter Basel, Hannover Medical School, University Hospital Balgrist, and Schulthess Clinic Zurich, already trust QUMEA's solution. QUMEA operates from Solothurn (CH), Stockholm (SW), and Mannheim (DE) and has a team of forty experts.
